IBM Algorithmics Integrating Algo Risk Application  
Information

**Length:** 16.0 Hours  
**Ref:** G1004G □  
**Delivery method:** Classroom  
**Price:** AUD

Overview

**\*\*\* For inquiries and scheduling for this course,  
please contact [wfssedu@us.ibm.com](mailto:wfssedu@us.ibm.com) \*\*\***

This is an IBM ISDR course.

This is a Technical class that introduces attendees to Algo Risk Application, the components and related services, architecture, and troubleshooting techniques in order to be able to manage the product on a day to day basis.

To provide participant with:

- A technical overview of Algo Risk Application
- Understanding Configuration files
- Starting and stopping services
- Troubleshooting services
- Log files, directory structures and best practices
- Linking cubes and data files
- Market configuration specifics, Basel Management Reporting configuration specifics
- Authentication modes, ASEC authentication (Basel)

Upon completion of this class attendees will be able to manage ARA, its services, log files and components.

Public

This intermediate course is designed for technical support, operators and Integration Engineers who need a good understanding of ARA.

Prerequisites

You should have Knowledge of windows, Unix**and** Linux at the command prompt, familiar with systems support **and** infrastructure

Objective

Please refer to Course Overview.
