You should have:

- Basic knowledge of database management
- Familiarity with source code control (SCC) mechanisms
- Basic knowledge of Ant and the Java programming language
- Knowledge of WebSphere Application Server
- Knowledge of Java Platform, Enterprise Edition (Java EE)
- Familiarity with the Representational State Transfer (REST) architectural style
- Familiarity with the WebSphere eXtreme Scale

Topics

- Course introduction
- Introducing Operational Decision Manager for administrators
- Exercise: Exploring the Operational Decision Manager installation
- Configuring Operational Decision Manager
- Exercise: Configuring Rule Execution Server on WebSphere Application Server
- Exercise: Configuring Decision Center on WebSphere Application Server
- Exercise: Using a profile template to configure Rule Execution Server
- Managing user roles and permissions
- Exercise: Customizing user access and enforcing security in Decision Center
- Synchronizing across environments
- Exercise: Synchronizing across business and development environments
- Managing deployment
- Exercise: Managing deployment
- Administering Rule Execution Server
- Exercise: Exploring the Rule Execution Server console
- Using Decision Warehouse to audit ruleset execution
- Exercise: Auditing ruleset execution through Decision Warehouse
- Monitoring execution and performance
- Exercise: Monitoring rule execution and performance
- Managing baselines and multiple releases
- Exercise: Managing baselines and multiple releases
- Introducing Decision Server Insights for administrators
- Exercise: Installing Decision Server Insights
- Configuring Insight Server
- Exercise: Configuring Decision Server Insights
- Managing deployment for Decision Server Insights
- Exercise: Managing deployment and connectivity
- Administering Decision Server Insights
- Exercise: Administering Decision Server Insights
