

□

IBM ICM Building the Model (V9.0)
Information

Length: 32.0 Hours
Ref: 1R116G □
Delivery method: Classroom
Price: AUD

Overview

This course teaches you the foundation of IBM Incentive Compensation Manager 9.0. You will learn to customize an ICM model by creating tables, calculations, components and data stores. Training demonstrations and exercises simulate a real-world implementation in an effort to enable students to apply concepts learned to their own IBM ICM implementations. The last day of class is spent working on a case study, where students will work in groups of 3-4 to design and build model objects that will calculate commissions earned for two fictional groups of employees. At the end of this course, you should be able to use all the basic functions of the software.

Public

This intermediate course is for Compensation administrators.

Prerequisites

You should have:

- Experience using basic Microsoft Windows 7 functionality
- Experience using Microsoft Excel

Objective

Please refer to course overview.
