IBM Algorithmics Introduction to Algo Credit Manager (v5.3)

Information

Length:	16.0 Hours
__Ref:	G3004G
Delivery method:	Classroom
Price:	AUD

Overview

*** **For inquiries and scheduling for this course, please contact wfssedu@us.ibm.com** ***

This is an IBM ISDR course.

This course will introduce the audience to the concepts of Algo Credit Manager (ACM) and explain the various options to view risk, exposure, mitigation, and limits. It will highlight the process of setting up counterparty structures, views of the own bank structures, and aggregation of risk across various criteria.

Public

This course is intended for relationship managers, credit managers, business division managers, risk managers and business analysts who will be working on the implementation.

Prerequisites

There are no prerequisites for this course.

Objective

Please refer to course overview.
