

□

IBM Cúram SPM for Developers (Customization) 7.X

Information

Length:	40.0 Hours
Ref:	9D74G □
Delivery method:	ClassroomInstructor Led OnlineSelf-paced Virtual Training
Price:	AUD

Overview

Teams building Cúram SPM solutions for customers must be able to analyze and customize out-of-the-box (OOTB) solutions. The first part of the course describes the approach that Cúram SPM uses for customizing OOTB applications compliantly. The main part of the course describes how to customize client and server artifacts, including source code and non-source code artifacts. The final part of the course outlines how REST and web services are used for integrating with external applications and how custom features can be implemented using events, deferred processes, and batch processes. During the course, learners will perform impact analysis on OOTB applications and implement compliant customizations.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

Public

This course is intended primarily for developers and technical architects who will work on IBM Cúram implementation projects. The course is also useful for anyone who needs a technical understanding of IBM Cúram SPM Platform 7.X, including testers and support engineers.

Prerequisites

Before taking this course, learners must have completed the following course:

- IBM Cúram SPM for Developers (ADE) 7.X (9D73G).

Objective

This training provides learners with the essential knowledge and hands-on skills required to analyze the Cúram SPM out-of-the-box (OOTB) solution and customize the OOTB solution compliantly using the IBM Cúram SPM ADE. Learners will perform impact analysis on OOTB applications and implement compliant customizations.

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process:

<http://w3.ibm.com/services/gbs/evita/BCSVTEnrl.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show:

- The current GTP list price
- The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

Topics

The course covers the following topics:

- Interpreting the IBM Cúram Enterprise Reference Model and processing class architecture.
- Impact analysis using product documentation.
- Customizing client and server artifacts compliantly.
- Integrating with external applications using REST APIs and web services.
- Implementing events, deferred processes, and batch processes.
- Gathering troubleshooting data.
