Overview

IBM Identity Governance and Intelligence is an advanced identity governance system. This course provides the foundational skills necessary to operate, administer, and accomplish the major business functions and analyses provided by Identity Governance and Intelligence. This course provides instruction and hands-on labs for managing the import of data and data exchange with target applications, managing the lifecycle role, modeling access risk control, running certification campaigns, designing workflow processes, and designing and administering reports.

Public

This course is designed for security professionals who administer IBM Identity Governance and Intelligence.
