IBM InfoSphere Business Glossary Essentials V9.1
Information

Length: 1.0 Day
Ref: KM612G-X
Delivery method: Classroom
Price: AUD

Overview

Business Glossary is a web-based tool that enables users to create, manage, and share controlled vocabulary and information governance controls in a repository called a business glossary. This course is designed to equip you with the knowledge and ability to create and use a business glossary within IBM InfoSphere Business Glossary. The course also takes into account other components of IBM InfoSphere Information Server and how they can contribute to the glossary maintenance. The course illustrates how users can practically apply the usage of a business glossary as a solution to an enterprise wide problem. Finally, this course demonstrates how to use the IBM InfoSphere Business Glossary Anywhere application to browse text documents and provide meaningful term definitions.

Public

Business Glossary Essentials V9.1 training is needed for the following client groups:

- New Information Server administrators
- IT managers
- Project managers
- Systems support personnel
