Overview

The eCommerce Essentials WebCast course is a half-day course that introduces you to electronic commerce, e-business, and Electronic Data Interchange (EDI). You will learn about translators, communication software, value-added networks, and interconnects.

Public

This basic course is for End User new to electronic commerce.

Prerequisites

There are no prerequisites for this course.

Objective

- Summarize the electronic commerce, e-business, and Electronic Data Interchange (EDI) concepts
- Describe the components in an EDI system
- Describe each of the standards supported in the application and why we use them
- Read and interpret the X12 Standards manuals

Topics

- E-Commerce Basic
- EDI Standards
