Introduction to Bluemix
Information

Length:	1.0 Day
__Ref:	CK001G-X [□]
Delivery method:	ClassroomInstructor Led Online
Price:	AUD

Overview

This course introduces you to IBM Bluemix, IBM's Platform-as-a-Service offering based on Cloud Foundry, Open Stack, and other open technologies. The course covers relevant cloud concepts, shows the architectural foundations of Cloud Foundry and Bluemix, and gets you started as a user of the platform. The course is designed as a starting point for enterprise developers but does not assume any programming knowledge.

Public

Programmers and Architects and managers of Programmers and Architects

Prerequisites

No prerequisites required

Objective

After you complete this course, you can perform the following tasks:

- Define Bluemix, its value proposition, and its deployment options
- Describe the architectural elements of Cloud Foundry behind Bluemix and Bluemix components
- Deploy simple applications to Bluemix in multiple ways
- Add and use available Bluemix services in an application

Topics

- Bluemix and Cloud Concepts
- Bluemix Architecture
- Bluemix Basics
- Bluemix Services
