

IBM Sterling Call Center and Sterling Store Administration
Information

Length: 1.0 Day
Ref: 6T836G-X
Delivery method: Classroom
Price: AUD

Overview

This 1-day instructor-led course provides you with an understanding of the configurations that need to be performed for IBM® Sterling Call Center and IBM® Sterling Store application. This course is primarily designed for administrators who need to configure the Sterling Call Center and Sterling Store application.

This course introduces you to the different order capture applications offered by IBM® Sterling Selling and Fulfillment Suite and then proceeds to focus on the back end configurations required to customize the Sterling Call Center and Sterling Store application. The course also focuses on the tasks that can be performed in the graphical user interface for Sterling Call Center and Sterling Store applications. Through a combination of procedural information and exercises, you learn about topics such as how to customize the order entry screens seen by the end users of these applications.

Public

This basic course is designed for administrator users who need to configure Sterling Call Center and Sterling Store applications.
