

# WebSphere Application Server V9 Administration in a Federated Environment Information

<b>Length:</b>	12.0 Hours
<b>Ref:</b>	WA599G
<b>Delivery method:</b>	ClassroomInstructor Led Online
<b>Price:</b>	AUD

## Overview

This course teaches you the skills that are needed to administer IBM WebSphere Application Server V9 in a federated environment.

This release of IBM WebSphere Application Server provides enhanced support for standards (notably Java 7 EE), emerging technology, and a choice of development frameworks.

In this course, you learn how to configure and maintain IBM WebSphere Application Server V9 Network Deployment. You learn how to deploy and create a deployment manager and federate a cell. In addition, you learn how to create a cluster within the federated cell.

Throughout the course, hands-on exercises and demonstrations reinforce lecture content. You gain practical experience with WebSphere Application Server V9 by completing tasks such as creating a deployment manager, federating a stand-alone application server, creating a custom profile, and clustering an existing application server.

For information about other related courses, see the IBM Training website:

## Public

This course is designed for WebSphere administrators who have experience with stand-alone application server environments, and want to learn about creating and managing a federated environment.

## Prerequisites

- Basic operational skills for the Linux operating system
- Administrative skills for a web server, such as IBM HTTP Server or Apache
- Basic understanding of cloud concepts, private, public and hybrid clouds, and specifically traditional on-premises environments
- Completion of course *WebSphere Application Server V9 Administration*(WA590G) or *WebSphere*

*Application Server V9 Administration* (ZA590G), or experience with WebSphere Application Server in a stand-alone environment

## Topics

Course introduction

WebSphere Application Server architecture: Federated

Federating a cell

Exercise: Configuring the lab workstation

Exercise: Creating a federated cell

Workload management

Exercise: Clustering and workload management

WebSphere security: SSL

Exercise: Configuring SSL for WebSphere

Overview of Intelligent Management
