Essentials of IBM Rational Requirements Composer, V4.0
Information

Length: 2.0 Days
Ref: RR353G-X
Delivery method: Classroom
Price: EUR

Overview

This course teaches analysts and engineers how to define, elaborate, organize, and manage textual and graphical requirements and requirements-related information in IBM® Rational® Requirements Composer. The course also teaches how to plan, create, configure, and manage Rational Requirements Composer projects.

Rational Requirements Composer is a key component of the Rational solution for Collaborative Lifecycle Management (CLM). The product provides requirements definition and management capabilities in a fully-integrated environment that can also include IBM® Rational Team Concert™ for change and configuration management, and IBM® Rational® Quality Manager for quality management.

Public

This basic course is for:

- Analysts
- Business analysts
- System analysts
- Project managers
- IT managers
- Process engineers
- Developers
- User experience engineers
- Quality assurance team
