

□

Administrating InfoSphere MDM Standard Edition V10  
Information

**Length:** 1.0 Day  
**\_\_Ref:** ZZ450G-X  
**Delivery method:** Classroom  
**Price:** EUR

Overview

This course is designed to teach you the basics of administrating the system and the tools used.

Public

This class is not focused on the Marketing or End-User side of the IBM Initiate Master Data Service platform, but rather on the behind-the-scenes processes that take place in a typical implementation.

Prerequisites

You should have taken Introduction to InfoSphere Master Data Management - Standard Edition.

Objective

- Use Initiate Workbench
- Manage system users with LDAP
- Use and configure Inspector

Topics

- Using Initiate Workbench
- Working with LDAP
- Using Inspector
