What is New in IBM InfoSphere MDM Server for PIM V9
Information

Length: 1.0 Day
Ref: DC712G-X
Delivery method: Classroom
Price: EUR

Overview

What is New in InfoSphere MDM Server for PIM course offering was designed especially for those users desiring to know what's new in IBM's InfoSphere MDM Server for PIM V9.0 product release and how they can utilize the newly enhanced features and functionality. The "User Experience" was the theme for the release and this course echoes that theme by illustrating through hands on labs, feature walk-thru, and in-depth coverage how users can benefit from the software enhancements.

This course will build upon your pre-knowledge of the IBM InfoSphere MDM Server for PIM product, and explore how to take advantage of the re-designed Single and Multi-Editing capability, Item to Category Mapping enhancements, Workflow updates, WQL query enhancements, and other newly added and enhanced functionality.

Public

This is an intermediate course for users with a strong WebSphere Product Center V5.x or MDM Server for PIM 6.0 background, and have a desire to learn about the new features and functionalities found within IBM InfoSphere MDM Server for PIM V9.0.

Prerequisites

You should complete:

- *Using InfoSphere MDM Server for PIM V9.0 (DC722)* or previous IBM InfoSphere MDM Server for PIM V6.0 courses

Objective

- Categorize items to single or multiple categories with the new functionality
- Leveraging the new functionality of the WQL Query search engine
- Update the business process workflow with active checked-out entries
- Utilize the re-designed Single and Multi-Edit User Interfaces
- Capture varying historical events for MDMPIM data objects

Topics

Overview

New features covered in the course

- UI Features
 - Single and Multi Edit Feature
 - Simplified Search Function
 - Item to Category Mapping
 - Rich Text Editor
- Enhanced Functionalities:
 - WQL Query Searches
 - Environment Import and Export Enhancements
 - Workflow Enhancements
 - History Manager

Underlying technology

- Archtitecture Overview
- Technologies used
 - Dojo
 - Java APIs

Additional feature highlights

UI Features

- Single and Multi Edit UI
- Simplified Search UI
- Item to Category Mapping
- Rich Text Editor

Enhanced Functions (day)

- WQL Query Search
- Environment Import and Export
- Workflow Change Propagation
- History Manager

MDM/PIM Underlying Architecture

- Architecture Overview

- New UI Layer
- Model View Controller
- Single Edit UI Architecture
- Flow Configuration
- Used Technologies
 - DOJO
 - Java APIs

Additional Features Highlighted

- Global Data Synchronization (GDS)
- UI Generator (UIG)
- Single Sign On (SSO)
- Content Management System Integration
- Cached Catalog
- MDMPIM Serviceability Tools: pimSupport and ISA Integration
