InfoSphere Optim Data Growth for Archiving on z/OS
Information

Length: 32.0 Hours
Ref: DT802G □
Delivery method: Classroom
Price: EUR

Overview

The IBM Optim Data Growth for z/OS course is designed to enable the students to successfully develop and execute an archiving strategy. This course provides a conceptual understanding of the data growth issue, as well as the Optim Solution's capabilities for managing data growth and improving the performance of critical business applications. This course serves as a foundation for the Optim Solution's features and functionality.

This course focuses on the technical aspects of the Optim Solution and is intended for technical audiences. Participants will learn the basics of how the technology works through hands-on exercises illustrating how the technology applies to business scenarios. This course does not include information on how to install and configure the technology.

This course prepares technical users with the Optim knowledge and skills necessary to participate in an Optim archive implementation project and confidently perform Optim tasks ongoing.

Public

This basic course is for Archive Project Leaders and project team members who will be responsible for implementing and executing an archiving strategy for one or more applications. This would include application developers, business analysts, and DBAs who have been assigned to your archiving project.

Prerequisites

To successfully complete this course, you should have a working knowledge of:

- DB2 and relational database concepts
- DB2 SQL basics
- TSO/ISPF editing commands and job output retrieval functions

Objective

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the

IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process:

Topics

- Introduction to IBM InfoSphere Optim Solutions
- The Optim Directory
- Introduction to Archiving
- The Archive Process
- Delete Archived Data
- Retry/Restart an Optim Process
- Create Database Objects
- Full Restore of Archived Data
- Search for Archived Data
- View Archived Data
- Selective Restore of Archived Data
- Optim Primary Keys and Relationships
- Relationship Traversal Concepts
- Export and Import Optim Directory Objects
- Batch Utilities
- Optim Security Overview
- Monitor Your Archive Strategy
- Performance Considerations
