IBM Tivoli Netcool OMNIBus 7.4 Administration and Maintenance Information

**Length:** 4.0 Days  
**\_\_Ref:** TN034G-X  
**Delivery method:** Classroom  
**Price:** EUR

Overview

This course is for IBM Tivoli Netcool/OMNIBus advanced users and administrators. Advanced configurations and implementations help guide participants to a better understanding of the core OMNIBus 7.4 features. This course is offered in both a classroom and online format, and provides multiple opportunities for hands-on lab practice. Most of the scenarios used in this class are based on using IBM Tivoli Netcool/OMNIBus V7.4 as a source application.

Public

This intermediate-level course is for experienced Netcool/OMNIBus administrators and advanced users.

Prerequisites

You should have the following:

- Linux/UNIX navigational and administrative skills
- Basic Networking and intercommunication skills
- SQL skills
- OMNIBus and Tivoli Integrated Portal user interface knowledge

Objective

- Describe the major functions of the Administrative GUI
- Configure some of the new features of OMNIBus 7.4
- Use both basic and advanced SQL
- Configure and run probe integrations
- Configure and use advance probe functions
- Configure and implement advanced gateway integrations
- Customize Tivoli Common Reporting portal reports
- Configure core components and standard integration for SSL and FIPS 140-2 compliance
- Implement and examine the ESF-based, multi-tiered architecture

Topics

- Administration GUI and new features
- SQL
- High availability and database administration
- Probe integrations
- Gateways
- Web GUI administration
- Customizing Tivoli Common Reporting reports
- Security
- Multi-tiered architecture
