IBM Maximo Asset Management 7.5 Fundamentals
Information

Length: 32.0 Hours
Ref: TR571G □
Delivery method: Classroom
Price: EUR

Overview

Learn the powerful features and functions available in IBM Maximo Asset Management. This hands-on course introduces the fundamental concepts and setup considerations of the various business areas supported by Maximo. Learning activities include lecture, demonstration, and labs covering a wide variety of applications, processes, and interrelationships within Maximo.

This course can help you make informed business decisions with the design and planning of their implementation. Consultants can gain a foundation upon which to build their product knowledge and skill set, and to work with clients to obtain optimal value from the product.

Public

This basic course is for Project Managers, consultants, and client project teams, whose members can include:

- System administrator
- IT administrator
- Maintenance personnel
- Procurement personnel
- Inventory personnel
- Asset manager
- Work manager

Prerequisites

You should have:

- General database knowledge

Objective

- Query and retrieve data
- Describe the asset management life cycle

- Enter core data elements and data structures
- Describe options that are available for various applications
- Describe and use the different Maximo applications and functions as they relate to business processes
