IBM Tivoli Netcool Omnibus 7.3 New Features Implementation Information

Length: 3.0 Days
Ref: TN500G-X
Delivery method: Classroom
Price: EUR

Overview

IBM Tivoli Netcool OMNibus 7.3 incorporates several advancements over previous versions of this enterprise level operations management solution. This course covers key changes in version 7.3, which include embedded web client capabilities previously delivered by IBM Tivoli Netcool Webtop, performance and scalability improvements, deployment enhancements, and improved Integration and Interoperation with other Tivoli software. You should already be familiar with using previous versions of the IBM Tivoli Netcool OMNibus software in an operational environment, prior to attending this session.

Public

This intermediate-level course is for existing OMNibus V7.2.1 and earlier advanced administrators and users. This course is intended to update current skill sets of OMNibus administrators, implementors, support personal and user communities to version 7.3 functionality.

Prerequisites

You should have:

- Previous Netcool/Omnibus administration **and** configuration experience

Objective

- Determine pre-instalation requirements
- Describe the new architecture and features
- Install OMNibus, Probes and Gateways and the Web GUI
- Configure Initial access in the TIP portal
- Navigate within the TIP and Web GUI portal
- Utilize Active Event List display
- Utilize new Event Dashboard layouts and parameters
- Configure Filters, Views, new fetures of Maps with the Web GUI with the extended WAAPI command set
- Utilize the Tivoli Integrated Portal (TIP) 1.1 System Cloneing Solution (SCS)

- Describe Load Balancing from a TIP and Web GUI perspective
- Describe/Utilize the Transient Filter Registry Service
- Configure Predictive Analytics from ITM
- Utilize connection failure/timeout handling and granularity tuning
- Utilize the Webtop Exporter
- Configure other new features

Topics

Unit 1: Introduction

- Requirements
- New Architecture
- New Enhancements
- Student Exercises

Unit 2: Installation/Upgrade

- Product Installation/Upgrade
- Probe and Gateway Installation and verification
- Web GUI installation and verification
- TIP interface
 - Load Balancing
 - LDAP authentication
 - New 'showevent' feature
 - System Cloning Solution
- Product Navigation
- Student Exercises

Unit 3: Event Lists and Dashboards

- The Event List display
- The Event Dashboard portal
- Multiple Data Sources
- Predictive Analytics
- Student Exercises

Unit 4: Filters and Views

- Filters
- Views
- Multiple Data Sources

- Student Exercises

Unit 5: Maps

- New Features
- Multiple Data Sources
- Student Exercises

Unit 6: Performance and other fetures

- Connection failure and granularity enhancements
- Webtop Exporter
- EIF library inclusion
- postmsg utilli
- Other features
- Student Exercises
