IBM Sterling File Gateway - Managing Sterling File Gateway Information

Length: 2.0 Days
Ref: 6T746G-X
Delivery method: Classroom
Price: EUR

Overview

This 2-day instructor-led course introduces you to the Sterling File Gateway functionality and provides the specific technical skills needed to deploy and support it. The course provides an overview of the features and provides hands-on exercises for creating routing templates, transforming file names, searching for files within a route, and reporting on file transfers.

Public

This basic course is for administrative users who administer the Sterling File Gateway application.

Prerequisites

You should have a working knowledge of:

- IBM® Sterling B2B Integrator

Objective

- Configure Sterling File Gateway
- Build a route template
- Describe the different persona's and their responsibilities
- Transfer a file from a producer to a consumer
- Define Routing Channels
- Broadcast messages
- Use the enhanced visibility to track a route
- Rebrand Sterling File Gateway
