Sterling Selling and Fulfillment Suite Participant Modeling and User Security Information

Length:	2.0 Days
___Ref:	6F02G-X_□
Delivery method:	ClassroomSelf-paced Virtual Training
Price:	EUR

Overview

This 2-day instructor-led course provides you with an understanding of the configurations that are required to map all participants in a supply chain to the corresponding roles in Sterling Selling and Fulfillment Suite. This course is primarily designed for Hub and Enterprise administrators.

This course begins with an overview of Sterling Selling and Fulfillment Suite and a brief introduction of its business models. The course then describes how to define Participants and create Organizations and users. Through a combination of procedural information and exercises, you learn about topics such as how to assign attributes to the different roles defined in Sterling Selling and Fulfillment Suite and configure user access policies.

Public

This course is designed to train Hub and Enterprise administrative users to map the participants in a supply chain to their appropriate roles in Sterling Selling and Fulfillment Suite.

Prerequisites

There are no prerequisites for this course.
