

□

IBM SPSS Data Collection Survey Authoring Translation Utility - ILT
Information

Length: 1.0 Day
__Ref: 0M145G-X
Delivery method: Classroom
Price: EUR

Overview

This course provides you with an understanding of how to integrate multiple contexts (or labels), such as languages, into a survey design. You will learn how to add multiple languages and/or contexts into the survey, use the Translation Utility accessory to manually add these alternate labels, adjust the survey to determine when to display the labels and finally deploy the amended survey.

Public

This basic course is for staff that will be using IBM SPSS Data Collection Author to create and deploy surveys with IBM SPSS Data Collection who want to sue the Translation Utility.

Prerequisites

You should have completed

- IBM SPSS Data Collection Survey Authoring Course

Objective

Please refer to course overview for description information.
