This is an IBM ISDR course.

IBM Algorithmics: Integrating Algo Credit Manager is a three-day, instructor-led course. IBM® Algo® Credit Manager enables financial institutions to define and manage all stages of the credit process and helps ensure that critical information is escalated in an accurate and timely fashion in order to assist decision-making. This course is designed to provide participants with in-depth knowledge of the technical installation, configuration, and data migration aspects of IBM Algo Credit Manager. Attendees will participate in interactive Demos and Workshops that illustrate key concepts while learning how to use the product.

Public

This advanced course is designed for software engineers, IT specialists, and integration specialists.

Prerequisites

You should have:

- Strong UNIX/Linux background, and understanding of XML

Objective

Please refer to course overview.
