IBM Tivoli Federated Identity Manager 6.2.2 Deployment and Administration Information

<b>Length:</b>	5.0 Days
<b>Ref:</b>	TW064G-X
<b>Delivery method:</b>	ClassroomInstructor Led Online
<b>Price:</b>	EUR

Overview

This course is an update to IBM® Tivoli® Federated Identity Manager 6.2.2 Deployment and Administration. It covers the new deployment model, new installation and configuration information, and new features in release 6.2.0 and later. These new features include OpenID, OAuth, user self care, SAML 2.0 attribute query, SAML 2.0 UnspecifiedNameID, new command-line capabilities, and custom STS updates and development.

Public

This intermediate course is for system administrator and deployment specialist.

Prerequisites

You should have the following skills:

- Access control
- SAML **and** other federation concepts
- Web services **and** web application servers
- XML

Objective
