IBM® Sterling Selling and Fulfillment Foundation Process Modeling Information

<b>Length:</b>	1.0 Day
<b>Ref:</b>	6F03G-X
<b>Delivery method:</b>	ClassroomSelf-paced Virtual Training
<b>Price:</b>	EUR

Overview

This 1-day instructor-led course provides students with an understanding of how to configure the Process Modeling module of Application Platform. This course is primarily designed for Hub administrators of IBM® Sterling Selling and Fulfillment Foundation.

This course begins with an overview of Process Modeling features, including how to set up a business process workflow for an organization. Students are then introduced to Statuses, Conditions, and other components of a process pipeline. The course then describes how to create a process pipeline.

Public

This intermediate course is designed to train Hub administrative users to create and configure process pipelines.

Prerequisites

You should have completed:

- Supply Chain Concepts (Online Tutorial)
- Participant Modeling and User Security Instructor-Led course

Objective

- Describe Process Modeling
- List the business process components
- Extend the following components:
