IBM ICM: Building the Model (V8.1)  
Information

**Length:** 32.0 Hours  
**\_\_Ref:** 1R027G □  
**Delivery method:** Classroom  
**Price:** EUR

Overview

IBM ICM: Building the Model (v8.1) teaches clients the foundation of IBM Incentive Compensation Manager 8.1. During the 4-day instructor led course, clients will learn to customize an ICM model by creating tables, calculations, components and data stores. Training demos and workshops simulate a real-world implementation in an effort to enable students to apply concepts learned to their own IBM ICM implementations. The last day of class is spent working on a case study, where students will work in groups of 3-4 to design and build model objects that will calculate commissions earned for two fictional groups of employees. At the end of this course, clients should be able to use all the basic functions of the software.

Public

This course is for customer Compensation Administrators and IT staff who will be involved with the implementation of IBM Cognos ICM.

Prerequisites

You should have experience with:

- basic Windows functionality
- Microsoft Excel

Objective

Please refer to the Course Overview for description information.
