IBM Spectrum Control 5.2.6 Cognos Reporting Information

Length:	1.0 Day
__Ref:	TS115G-X
Delivery method:	ClassroomInstructor Led Online
Price:	EUR

Overview

This course is a 1-day instructor-led course in which you learn to create Cognos reports in the TPC web-based GUI. The course also covers Cognos configuration to email reports and export them to file systems.

Public

This is an intermediate-level course for individuals who are involved in the planning, installing, configuring, and upgrading of IBM Tivoli Storage Productivity Center

Prerequisites

You should understand storage virtualization, SAN management,**and** zoning.

Objective

- Generate the predefined reports in the web-based GUI
- Use Query Studio in the web-based GUI to create new reports
- Define schedules to automate reports
- Define output formats
- Connect your Cognos server to a second TPCDB database
- Restore deleted reporting packages

Topics

Lecture:

o Cognos Reporting

- Lesson 1 - Introduction to Tivoli Cognos Reporting
- Lesson 2 - Query Studio

- Lesson 3 - Customizing Cognos
- Lesson 4 - Multiple server access for Tivoli Common Reporting
- Lesson 5 - Restoring deleted predefined reports

Labs:

- Exercise 1 - Testing the status of the local server and adding a remote server to monitor
- Exercise 2 - Viewing and modifying a predefined report
- Exercise 3 - Configuring email in Cognos
- Exercise 4 - Scheduling a report for distribution
- Exercise 5 - Using Cognos reports to determine resource relationship and performance
- Exercise 6 - Modifying a report in Cognos Report Studio to consolidate multipath information
- Exercise 7 - Configuring Cognos to save reports to a file system
- Exercise 8 - Saving a report to an external file system
- Exercise 9 - Creating a report by using Query Studio
- Exercise 10 - Running the new report
- Exercise 11 - Gathering data and reporting changes in Cognos
- Exercise 12 - Reporting on multiple Spectrum Control servers
- Exercise 13 - Restoring default reports
