

IBM Content Manager System Administration 8.4 Information

Length:	4.0 Days
Ref:	IM52G-X
Delivery method:	ClassroomSelf-paced Virtual Training
Price:	AUD

Overview

This course is for those whose job includes responsibility for maintaining, monitoring, and configuring an operational Content Manager system. Maintenance tasks include administering users and groups, and maintaining all components of the various business processes or applications that run on the system. Monitoring tasks include ensuring that proper database sizing and backup parameters are met.

Work with a fully functioning IBM Content Manager system to practice the skills required to administer, maintain, and troubleshoot an IBM Content Manager system.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.
