

IBM Spectrum LSF Basic Configuration and Administration for Linux Information

Length: 24.0 Hours
Ref: H010G
Delivery method: Classroom
Price: AUD

Overview

This course teaches IBM Spectrum LSF 10.1 version.

The course is designed to give system administrators the knowledge required to implement and maintain LSF in their working environment. They will gain a solid understanding of workload resource management, cluster configuration and administration. The workshops provide valuable experience with the installation of LSF, cluster configuration and administration. The system administrator will also learn helpful hints and tips and develop fundamental troubleshooting skills.

Public

System administrators who will implement the LSF cluster and who will be responsible for managing and administrating the LSF cluster.

Prerequisites

You should:

- be familiar with UNIX/Linux
- **and** have basic UNIX/Linux system administration experience

No previous experience with IBM Platform products is assumed or required.
