

IBM MQ V9 System Administration (using Windows for labs)
Information

Length:	32.0 Hours
Ref:	WM153G
Delivery method:	ClassroomInstructor Led Online
Price:	AUD

Overview

This course provides technical professionals with the skills that are needed to administer IBM MQ queue managers on distributed operating systems and in the Cloud. In addition to the instructor-led lectures, you participate in hands-on lab exercises that are designed to reinforce lecture content. The lab exercises use IBM MQ V9.0, giving you practical experience with tasks such as handling queue recovery, implementing security, and problem determination.

Note: This course does not cover any of the features of MQ for z/OS or MQ for IBM i.

For information about other related courses, see the IBM Training website:

Public

This course is designed for technical professionals who require the skills to administer IBM MQ queue managers on distributed operating systems, in the Cloud, or on the IBM MQ Appliance.

Prerequisites

- Basic knowledge of IBM MQ V9 concepts and features, obtained either through experience or by successfully completing Technical Introduction to IBM MQ (WM103G) or Technical Introduction to IBM MQ (ZM103G)
- Ability to invoke standard functions within the operating system that is used in the lab exercises
- Some knowledge of TCP/IP configuration

Topics

- Course introduction
- IBM MQ review
- IBM MQ installation and deployment options
- Creating a queue manager and queues

Exercise: Using commands to create a queue manager and queues
Introduction to IBM MQ Explorer
Exercise: Using IBM MQ Explorer to create queue managers and queues
Testing the IBM MQ implementation
Exercise: Using IBM MQ sample programs to test the configuration
Implementing distributed queuing
Exercise: Connecting queue managers
IBM MQ clients
Exercise: Connecting an IBM MQ client
Implementing trigger messages and monitors
Exercise: Implementing a trigger monitor
Diagnosing problems
Exercise: Running an IBM MQ trace
Implementing basic security in IBM MQ
Exercise: Controlling access to IBM MQ
Backing up and restoring IBM MQ messages and object definitions
Exercise: Using a media image to restore a queue
Exercise: Backing up and restoring IBM MQ object definitions
Introduction to queue manager clusters
Exercise: Implementing a basic cluster
Monitoring and configuring IBM MQ for performance
Exercise: Monitoring IBM MQ for performance
Course summary
