IBM Maximo Asset Management Scheduler 7.5.1
Information

Length:	6.0 Hours
Ref:	TOS36G-X
Delivery method:	Self-paced Virtual Training
Price:	USD

No sessions available.
Overview

This course takes you through the new Maximo Asset Management Scheduler V7.5.1 with hands-on exercises, including the new graphical features. With Maximo Asset Management Scheduler V7.5.1, planners can view upcoming or forecasted work graphically, reschedule work against the availability of the resources, and adjust the work schedule. You explore the new Graphical Assignment and Graphical Dispatch included with IBM Maximo Asset Management Scheduler V7.5.1. Work managers can now graphically view work requirements and the available labor resources and assign resources accordingly. A dispatcher can also view the various routes that the labor assignments require and adjust the route accordingly. This dispatcher also includes new IBM Maximo Everyplace templates for dispatch. You also work with crews that have been added to Maximo Asset Management Scheduler V7.5.1.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.
