IBM i2 Text Chart 8 User
Information

Length: 1.0 Day
Ref: 9T239G-X
Delivery method: Classroom
Price: EUR

Overview

This course is aimed at users new to i2 Text Chart and assumes no prior knowledge of other i2 products. Extract text from documents and create a chart to show a visual interpretation of the data. Learn basic charting concepts, rules, and conventions. Create both association and time-based charts and learn how to store additional information and characteristics on your chart. Analyze the output of an i2 Text Chart Workspace using i2 Analyst's Notebook. An interactive course using a combination of lecture, hands-on work, and exercises.

Public

This basic course is for anybody who wishes to use i2 Text Chart.
