Designing, Implementing, and Managing IBM MQ V9 Clusters  
Information

<b>Length:</b>	20.0 Hours
<b>Ref:</b>	WM253G
<b>Delivery method:</b>	ClassroomInstructor Led Online
<b>Price:</b>	EUR

Overview

This course prepares you to plan, design, configure, and administer IBM MQ clusters.

After a review of IBM MQ, the course explains the similarities and differences between administration of a cluster and administration of a distributed message IBM MQ environment. You learn cluster specific commands and procedures, and explore the role of a cluster in a highly available IBM MQ infrastructure. You learn how to do a detailed verification of a new cluster configuration, review and identify all resulting components, and troubleshoot problems.

You also learn about cluster administration, workload balancing, security, and use of publish/subscribe clusters. You learn how to recognize when a problem is due to connection authentication, channel authentication, or object authorizations. You also learn about design options such as overlapping clusters and use of clusters with z/OS queue sharing groups. Many of the considerations in this course are based on actual engagement experiences.

Public

This course is designed for IBM MQ administrators, architects, application developers, and other professionals who need to understand the design considerations, architectural role, and implementation of IBM MQ clusters

Prerequisites

Before taking this course, you should have experience with IBM MQ or complete one of the following courses:

- *IBM MQ V9 System Administration (using Windows for labs)*(WM153G)
- *IBM MQ V9 System Administration (using Linux for labs)*(WM154G)

- *IBM MQ V8 System Administration for z/OS* (WM302G)

You should also have working knowledge of the Windows operating system to run the lab exercises.

## Topics

Course introduction

IBM MQ baseline

Exercise: Configuring and reviewing base IBM MQ resources

Before you start

Understanding and implementing an IBM MQ cluster

Exercise: Implementing and verifying a cluster, cluster queues, and a cluster gateway

Cluster administration tasks and commands

Exercise: Working with cluster administration tasks

IBM MQ security and clusters

Exercise: Working with IBM MQ security

Influencing workload balancing behavior

Exercise: Working with workload balancing options

Publish/subscribe and clusters

Exercise: Configuring a publish/subscribe cluster

Cluster design considerations

Exercise: Configuring an overlapping cluster
